

predict

Predict your cash flow using our powerful forecasting and budget analysis software. Tailored to your specific needs, Predict uses double-entry accounting principles to ensure the integrity of your data without encountering the undetected errors that creep into spreadsheets. This rigorous approach allows the generation of an integrated report set of potential Profit & Loss, Balance Sheet, and Cashflow Statement.

Predict offers a wealth of features, including the ability to enter actual expenditure against forecasted data, providing variance reports, the ability to re-forecast, as well as performing what-if analyses.

Providing accurate up-to-the-minute financial information, this management tool is essential for business owners planning and managing the successful growth of their business.

Predict Annual

Invest in a realistic cashflow forecast for the coming year, providing you with the ability to identify potential cashflow shortages ahead of time, and giving you the confidence you need when dealing with your financiers and other key stakeholders.

Predict Monthly

Control your business cash flow through a monthly review of actual expenditure against forecasted data. Enjoy a monthly phone call with one of our Senior Accountants, to review the performance of your business, and also gain the benefit of applying their insight and knowledge to the multitude of challenges you face in your business each day.
